

Name:

Date:

Period:

1. Solve: $2y - \frac{3}{5} = \frac{1}{2}$

2. Solve: $y - \frac{2}{5} = -\frac{1}{3}$

3. Solve: $\frac{1}{4} + \frac{1}{2}x = 4$

4. Solve: $\frac{2}{5}x - \frac{4}{5} = -3$

5. Solve: $\frac{3}{2}x + \frac{3}{2} = 2$

6. Solve: $2x + \frac{2}{3} = 5$

7. Solve: $\frac{1}{4}x + x = -3 + \frac{1}{2}x$

8. Solve: $\frac{1}{3} + 2m = m - \frac{3}{2}$

9. Solve: $m + \frac{2}{3} = \frac{1}{4}m - 1$

10. Solve: $\frac{1}{2} + \frac{2}{5}x - 1 = \frac{1}{5}x + x$

11. Solve: $\frac{1}{5}m + \frac{2}{3} - 2 = m - \frac{2}{5}$

12. Solve: $-\frac{1}{4}w - 3 = w + \frac{1}{3}$
